**18 PLAYERS: CHOOSE THE RIGHT ONE FOR YOUR NEEDS.** 

A range of 18 no-compromise machines with inimitable Lamborghini Trattori character catering for every possible the fruit orchard and vineyard. Potent FARMotion Stage 3B (Tier4i) engines, the extraordinary manoeuvrability of a front axle carrier conceived for maximum steering angle even when using larger tyres, and incredible verastility for working with any type of implement (side shoot removers, pruner attachments and hydraulic in-row cultivators) offered by the rear hitch and cultivators) and cultivators and cultivators.

capable hydraulic system. On top of all this, there's also the choice of independent front suspension on the Spire S and Spire V: working in your fruit orchard or vineyard will never be the

.9mez

Dimensions calculated according to ETRTO tyres specifications

To find out more, visit the website lamborghini-tractors.com

Lamborghini Trattori is a brand of @SDF

# Lamborghini orchard range. **A team of champions.**

### > PURE POWER. Stage 3B (Tier4i) engine.

A tireless and hard-working engine which reduces emissions with an electronically controlled EGR system, which only recirculates exhaust gas when needed and in the requested quantities, combined with a DOC catalyst to attain compliance with Stage 3B (Tier4i) emissions regulations. High pressure (2000 bar) Common Rail injection with 7 hole injectors ensures instantaneous injection times for extraordinary fuel economy, especially when working between rows. This excellent flexibility translates to the

immediate response necessary for fruit farming, vineyard, arboriculture and nursery jobs.

The driver can also store and recall ideal engine speeds for working with different implements: a function that keeps the tractor at a constant ground speed with varying load for maximum productivity.

## > RAPID, RESPONSIVE AND TIRELESS.

The ECO transmission.

Work faster with all the efficiency you could ever want: ECO transmissions are quick and responsive, with intelligently spaced gear ratios for superlative fuel economy.

Choose the right solution for your crop: 30+15 speed fully mechanical gearbox with underdrive offering up to 3 ranges (with supercreeper), 5 gears and 3 Powershift ratios, for a total of 45 forward and 45 reverse speeds. All LS models are equipped with a mechanical reverse shuttle, while GS versions feature a hydraulic reverse shuttle, the Stop&Go function and ComfortClutch.

#### > PERFECTLY AT HOME IN **CRAMPED CONDITIONS.** Precise, responsive steering.

Lamborghini Trattori has developed an innovative system that offers excellent manoeuvrability in spite of the tractor's compact dimensions: the front carrier tapers inward with a unique geometry that minimises the turning radius. This capability is complemented by a dedicated pump delivering oil to the steering system only.

**STYLE OF A LEADER.** Elegant design, impeccable comfort.

The completely revised livery is aggressive and functional in keeping with Lamborghini Trattori's unmistakable style. The redesigned hood has no sharp edges or corners to keep plants and the fruit safe from damage.

In spite of their narrowness, comfort and space have still been a priority in designing these tractors: with ergonomic, rationally laid out controls, innovative soundproofing materials, antivibration panels for superlative comfort, a driver zone that can be tailored completely to the needs of the operator and the possibility of fitting 28", 24" and 20" tyres. The pressurised air conditioned cab, with directional vents keeps you safe when applying chemical crop treatments.

12 STRENGTHS

- 3 or 4 cylinder FARMotion Stage 3B (Tier4i) turbo intercooler engines with 2000 bar Common Rail injection
- 30+15 speed mechanical transmission with underdrive or 45+45 speed transmission with supercreeper gear and 3 stage Powershift, for a top speed of 40 km/h at economy engine speed
- LS version with mechanical reverse shuttle and GS version with hydraulic 3 PowerShuttle, Stop&Go function and ComfortClutch
- PTO with up to 3 speeds (540/540ECO/1000) and ground 4 speed PTO, all with multiplate wet clutch
- Front axle designed to maximise the steering angle, 5 with unlimited steering action even with Auto 4WD front suspension

Independent wheel front suspension: 6

- Anti-dive: for increased stability and safety when braking
- Anti-roll: for optimised grip in all conditions
- Traction control: for uninterrupted tractive power
- Hydraulic system with 38+26 I/min. pump
- Auxiliary distributors: 3 mechanically controlled rear 8 distributors, for a total of 6 couplers, with flow regulator; 4 belly couplers duplicated by the 6 at the rear of the tractor, or 6 couplers plus a 2-way electrohydraulic distributor
- 9 Mechanically or electronically controlled rear hitch with automatic quick coupling rear linkage

# **RF** Target and Spire F Target. USER-FRIENDLY CONTROLS.

The RF Target and Spire F Target models are unbeatable in the challenges you face every day in your fruit orchard or vineyard: with a cabless platform, 3 or 4 cylinder FARMotion Common Rail (Stage 3B) engines or 3 or 4 cylinder SDF 1000 Series engines (Stage 3A) and a choice of 9 different models offering an outstanding combination of sturdiness and simplicity. 20FWD+10REV transmission with 5 speed synchronised gearbox, 2 ranges and underdrive with synchronised mechanical

reverse shuttle; or 30FWD+15REV transmission with 5 speed synchronised gearbox, 3 ranges and underdrive, with a top speed of 40 km/h at engine economy speed (40 km/h with 20" rear tyres). 3-speed PTO (540/540EC0/1000) + optional ground speed PTO, delivering unstoppable power even with the most demanding implements: front wheel drive and differential lock for extraordinary traction in all conditions, while a hydraulic system with a flow rate of 45 I/min. and

with 4 or 6-way rear distributors ensures precise control of any hydraulic implement.

Suspended pedals, the adjustable steering wheel and innovative anti-vibration and soundproofing materials are the secrets to the extraordinary comfort of Target tractors, while the transmission levers to the right of the driver make getting into and out of the driver seat even easier and are just one example of the many practical solutions adopted.
